

ShadowTrack ShadowCuff™

Designed for security
and reliability

Enables positive reinforcement and gamification on a small discreet device that encourages the participants throughout their rehabilitation process.

The ShadowCuff™ is an ankle worn high security one-piece GPS tracking device that helps properly monitor program compliance.

Features & Benefits

- **Continuous Tracking:** Utilizes GPS, Wi-Fi, and LBS technology for seamless location monitoring.
- **High Security:** Highly cut-resistant and patented titanium reinforced design with multi-sensor tampering detection.
- **Most Complete Cellular Communication:** Uses a military-grade (Cat M1) modem for the most advanced communication across all cellular and data networks.
- **High Frequency Tracking:** Definable tracking intervals of up to once every 30 seconds.

Cutting-Edge Security

The ShadowCuff™ isn't just a tracking device; it's a fusion of cutting-edge security and ease of use. With its robust, one-piece design and advanced location technologies, it sets the standard for reliability and convenience in monitoring solutions.

- Water-resistant (IP67)
- Opens electronically with officer app or Smart Key
- 30-day memory storage
- GPS and cellular connectivity
